HOW TO CONFIGURE A PC

Muhammad Iqbal Maulana/25

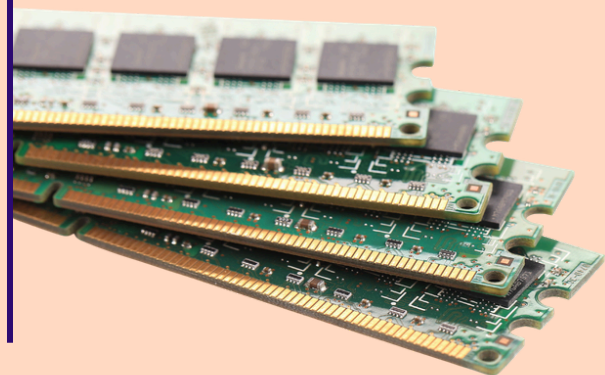

The CPU 1. socket has been located

The CPU has been aligned and securely locked in place. And make sure the fan has been aligned in the CPU correctly.

The **RAM** has
been firmly
inserted

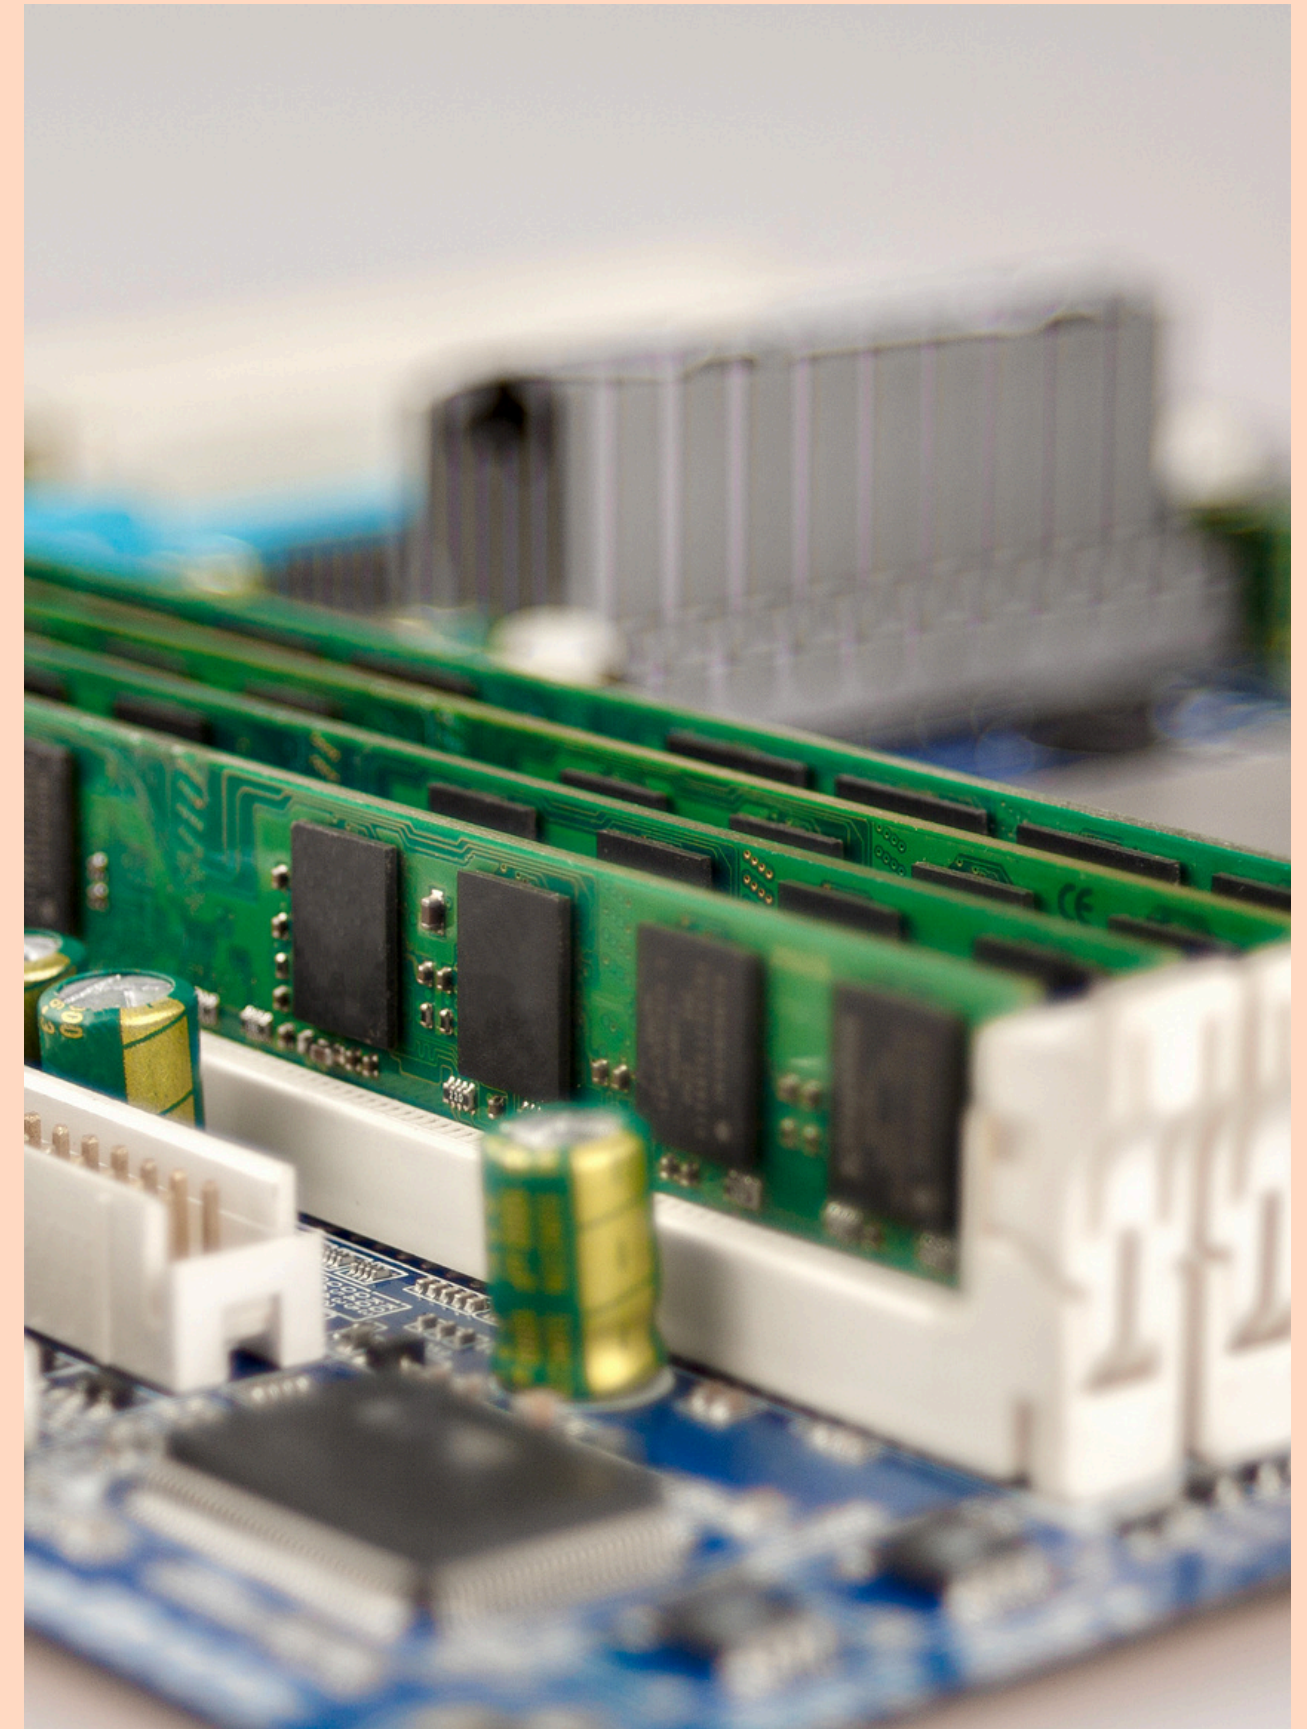

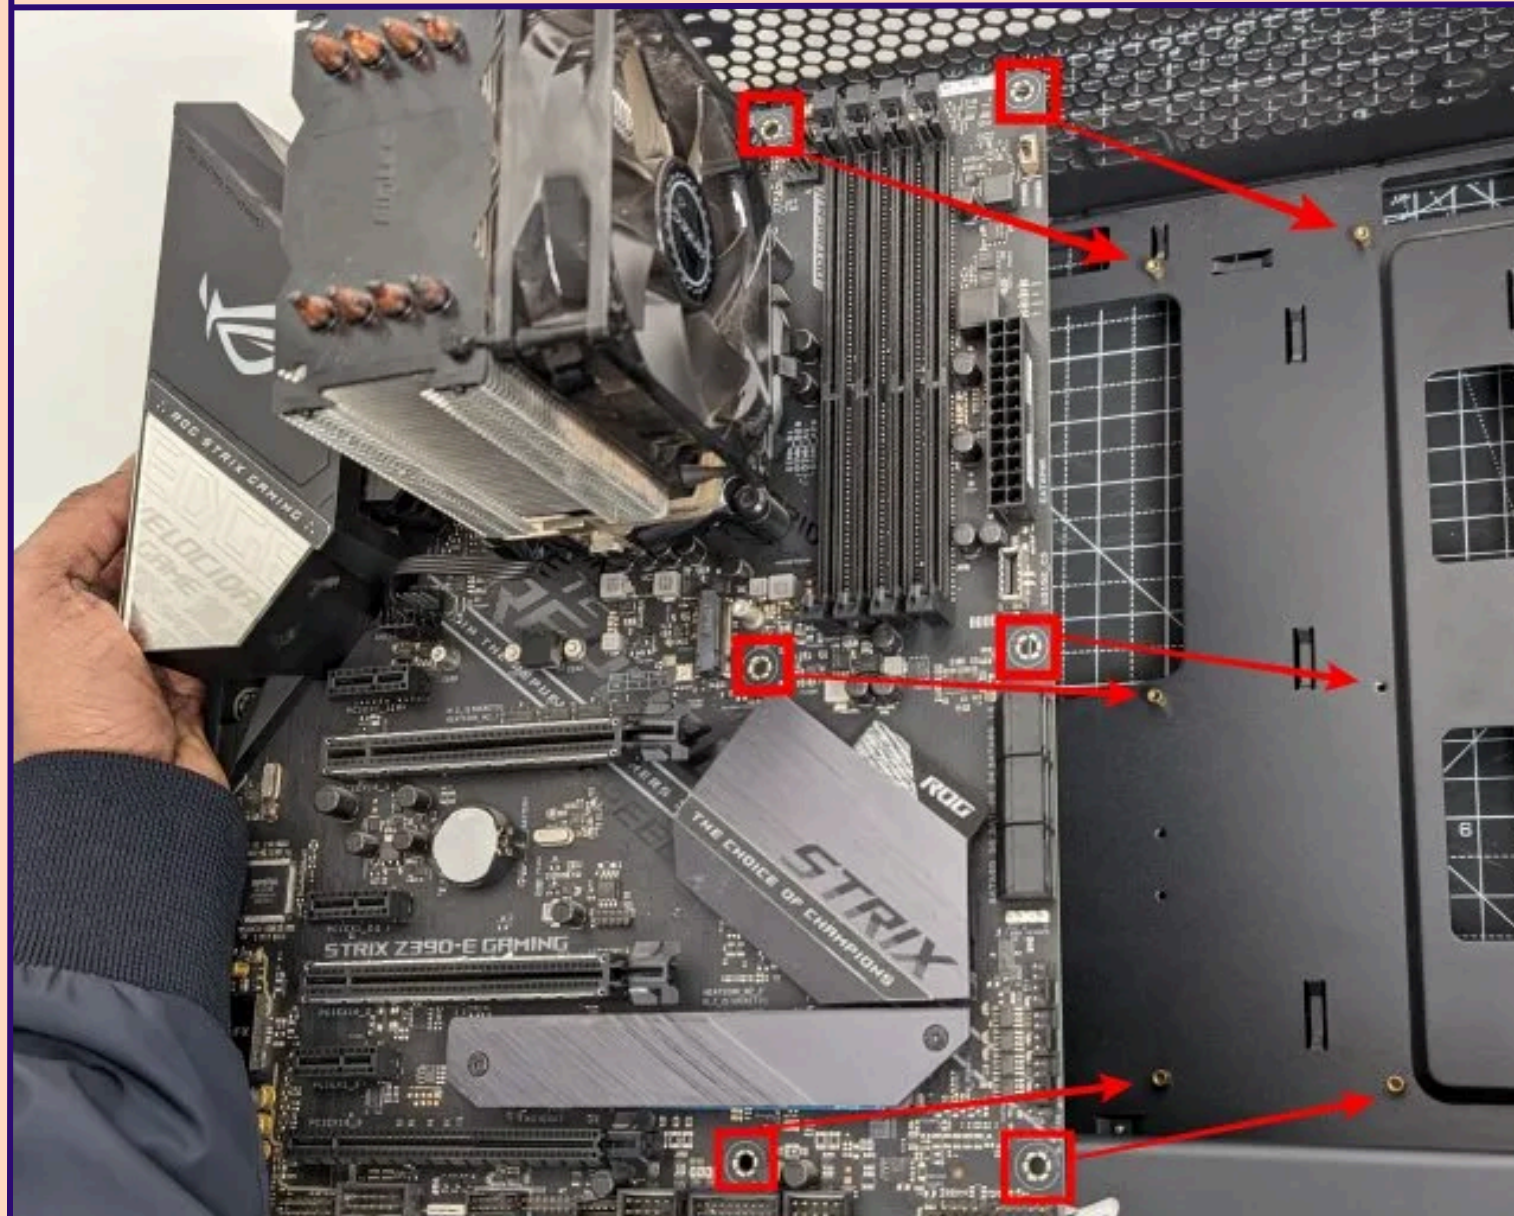

The RAM has been firmly inserted
into the slot with a satisfying click.

Also the GPU has been inserted in
the socket gently.

XI SIJA II

The
**MOTHER
BOARD**
has been mounted

The motherboard has been successfully mounted into the case and connected to the necessary cables from the Power Supply Unit (PSU). And lastly, the PC case has been closed and shut using screws.

THANK YOU

Muhammad Iqbal M. / 25
